

Maximum image vibrancy & Minimum environment reflection/glare

ImageVue is popular with advertisers, because printed graphics are vibrant, attracting the attention of the public. Get your advertisement noticed and seen with ImageVue.

Did you know that ImageVue is designed with more printable surface area per square metre than any other One Way Vision film? ImageVue is a great choice to maximise printed image whilst significantly reducing the reflections from the environment, such as clouds and glare from the sun.

ImageVue is an economical perforated vinyl yet retains the great One Way Vision effect.

ImageVue Benefits

- ✓ **Maximum printed image brightness and vibrancy**
- ✓ **Attracts people's attention to the printed image**
- ✓ **Minimises the reflection of the outdoor environment such as clouds**
- ✓ **Helps reduce bird strikes on glass windows typically above the first floor**
- ✓ **Minimises the glare from the sun for people inside looking out**
- ✓ **Helps reduce fading of stock, furniture and fittings in store**

Background

Clear Focus One Way Vision are the One Way Vision experts. ImageVue has been designed to attract people's attention due to it looking like a solid piece of vinyl on the window yet allowing view-ability from inside of the building, looking out. Thereby maximising the campaign value and giving your window advertisements the wow factor.

Dominate outdoor advertising, maximise the number of people seeing your message, give privacy to what's inside yet provide a clear view to the outside. No risk of falling off due to strong adhesion to glass.

Specify ImageVue

ImageVue has 1.5mm holes with 20% of the vinyl perforated, leaving 80% of vinyl for printing. This makes it a great choice for shop fronts, office windows, glass doors and glass balustrades. We suggest you **specify Clear Focus One Way Vision ImageVue** for the sign/printing company to use on your next short term window signage project. ImageVue is available Australia wide from our authorised distributors. Your printer may contact us to learn who is their closest authorised distributor. On our web site are many resources and documents to support you and your printer.
